

Water heater maintenance recommended every 3 years

With reference to Enterprise Singapore circular [Cir 2018-05](#):

Registered suppliers are to recommend an optional safety maintenance schedule for the storage water heaters, applicable after the AOS 3-year warranty period. It is recommended that maintenance checks should be conducted every 3 years or at homeowner's discretion.

Maintenance checks will be done on following components:

- thermostat
- pressure relief valve
- relief valve drainage tube or pipe
- internal wiring
- piping connections for leaks or pressure build up and
- heater is installed on at least 15A isolator
- Circuit board (earth leakage circuit breaker, ELCB) trip test
- any other signs of malfunction

Maintenance cost does not include the cost of replacement of parts (quoted when required)

Annual maintenance cost schedule (incl. GST)

Heater type	First heater	Subsequent heater in same location
Solar water heater	\$267.50	\$214.00
Heat pump water heater	\$160.50	\$107.00
Digital water heater	\$85.60	\$42.80
Electric water heater	\$85.60	\$42.80
