

# MAGNUM

ENERGY SAVING WATER HEATER

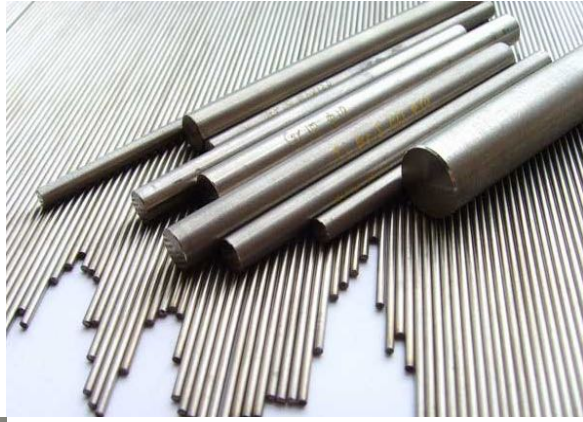

## Warranty

1 year full warranty, includes labour, transport and parts.

2 year tank warranty, does not include installation. Access to heater must be provided.

## 100,000 times impact testing

We put our heaters through years of daily use in just 2 weeks. That's because we aren't just selling heaters. We're selling showers with a complete peace of mind.

## Single line welded inner tank

Unlike common multi-welded tanks in the market, single welded tanks reduce the chances of leakage considerably, providing superior durability and strength.

## Heavy duty tank with titanium enamel coating

Our tanks are thicker and 23% stronger than an average stainless steel tank. They are further reinforced with titanium enamel coating, fused at extremely high temperatures of 870°C.

## Energy saving foam insulation

Extra thick foam insulation keeps water hot for longer periods. This means an environmentally friendly heating process, lower electricity bills and more hot water when you need it.

## Magnesium anode with stainless steel core

Specially designed to protect the tank from corrosive elements, the system uses a special cathodic action to fight corrosive reactions, prolonging the life of the water heater.

## Technical Specifications

	Capacity (lit)	Dimensions (mm)	Voltage/Frequency (V/Hz)	Wattage (kW)	Rated pressure (Mpa)	Weight (kg)	Max Temp (°C)
MAG-30	30	Ø380 x 540	230/50	3.0	0.8	15	75
MAG-50	50	Ø380 x 740	230/50	3.0	0.8	19	75
