

## RECOMMENDED SETTINGS

- Mode** Multiple
- Temperature** Showers: 50°C  
Bathtubs: 65°C

Without power, panel will retain settings for 48 hours.

**RECOMMENDED TEMPERATURE**  
Regular heaters are fixed at 70°C. Use settings below to save energy.

- **Showers:** set to 50°C
  - **Bathtubs:** landed homes, large rain showers: set to 65°C
- Do not** set below 50°C to avoid bacteria development

**ACTUAL TEMPERATURE**  
This shows actual temperature in tank. It may be different from the setting temperature.

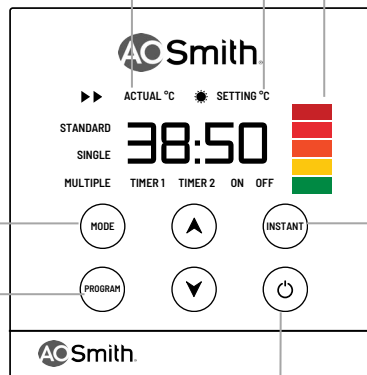

**RECOMMENDED MODE**  
For Singapore: **Multiple** is the most efficient mode.

With Single or Standard mode, you will get less hot water.

**CLOCK AND TIMER**

- To save more energy, **disable the timer**. It is better to turn off the heater when not in use.
- Timer demo: [www.aosbath.com/clock](http://www.aosbath.com/clock)

**TEMPERATURE INDICATOR**

- **Red:** hot
- **Yellow:** warm
- **Green:** cold

**Save time:**  
3 red bars or more means you can shower immediately.

**INSTANT HOT WATER**  
In multiple mode, this is an automatic function.

**POWER**

- Do not use the panel to power off.
- Use switch to power off.
